Determination of Chloride Ion Concentration by Titration ... -
11. SAFETY FIRST - Chemistry experiments should be done in a controlled, carefully supervised environment such as a school lab (laboratory) or learning center lab unless specifically designed to be safe as a home experiment. Sat, 14 Apr 2018 18:32:00 GMT
Chemistry Page 2 -
www.101science.com - A pH indicator is a halochromic chemical compound added in small amounts to a solution so the pH (acidity or basicity) of the solution can be determined visually. Hence, a pH indicator is a chemical detector for hydronium ions (H_3O^+) or hydrogen ions (H^+) in the Arrhenius model. pH indicator - Wikipedia - 2 Index Page
